

KASHABOINA CHARAN

Vadodara, Gujarat, India | +91-9391481840 | charankumarmudhiraj3@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

B.Tech Computer Science Engineering (Cyber Security) student with hands-on experience across network security, vulnerability assessment, and Python-based security automation, paired with applied Generative AI development spanning LLMs, prompt engineering, and Retrieval-Augmented Generation (RAG). Skilled in building AI-powered security tools using OpenAI, Claude, and Gemini APIs, LangChain, and vector databases. Comfortable working across the stack — from SIEM and incident response workflows to FastAPI/React application development. Known for fast learning, structured problem-solving, and shipping working prototypes rather than just theory. Seeking an internship where cybersecurity fundamentals and Generative AI skills can be applied to real-world, production-facing problems.

TECHNICAL SKILLS

Programming: Python, JavaScript, SQL, C

Cyber Security: Networking (TCP/IP, HTTP/HTTPS), Linux, Windows, Nmap, Wireshark, Burp Suite, Metasploit, OWASP Top 10, Vulnerability Assessment, Penetration Testing, SIEM, IDS/IPS, EDR, Digital Forensics, Incident Response, Malware Analysis, Cryptography

Generative AI: Prompt Engineering, LLMs, OpenAI API, Claude API, Gemini API, Hugging Face, LangChain, RAG, AI Agents, Vector Databases, Embeddings, MCP Basics, AI Workflow Automation

Frontend: HTML, CSS, JavaScript, React

Backend: FastAPI, Flask, Node.js

Database: MongoDB, PostgreSQL, Firebase

Tools: Git, GitHub, VS Code

PROJECTS

Blockchain-Based File Integrity System

Academic Project | Ethereum, Solidity, Node.js, MongoDB, IPFS

- Developed a Blockchain-Based File Integrity System using Ethereum, Solidity, Node.js, and MongoDB.
- Implemented SHA-256 hashing to ensure secure and tamper-proof file Verification.
- Designed and deployed smart contracts for immutable storage of file hashes on the blockchain.
- Integrated IPFS and MetaMask to enable decentralized storage and secure transaction authentication.

Password Generator | Python

Personal Project | Python

- Built a Python-based password generator to create secure, randomized passwords based on user-defined length.
- Implemented password generation using uppercase and lowercase letters, digits, and special characters.
- Applied Python concepts including functions, loops, string manipulation, and user input handling.
- Utilized the random and string libraries to generate strong and unpredictable passwords.
- Enhanced understanding of secure password generation and Python programming fundamentals.

Portfolio Website Built Using Lovable (Vibe Coding)

Personal Project | Lovable, HTML, CSS, JavaScript

- Built a responsive portfolio website using AI-assisted development with Lovable.
- Showcased projects, technical skills, certifications, and contact information in a modern UI.
- Implemented responsive design for desktop and mobile devices.
- Optimized website structure and performance for a smooth user experience.

CERTIFICATIONS

- Startup School Certificate - Parul Innovation & Entrepreneurship Research Centre (PIERC), Parul University
- Cyber Security Tutorial Module – Scaler Topics
- Introduction to Artificial Intelligence - Great Learning
- Network Security Fundamentals – Palo Alto Networks Academy
- Introduction to Python - Infosys Springboard
- Machine Learning Using Python -Great Learning Academy
- What Is Generative AI - LinkedIn Learning
- Cybersecurity Foundation – Palo Alto Networks Academy

EDUCATION

B.Tech, Computer Science & Engineering (Cyber Security)

2023-2027

Parul University, Vadodara, Gujarat | CGPA : 6.44/10

Higher Secondary Education (XII), Open Intermediate

2021-2022

Govt Junior College, Suryapet, Telangana | Percentage: 64%

ACHIEVEMENTS

- Built and deployed 3+ AI applications independently within 6 months of learning Generative AI concepts.
- Startup School Certificate – Successfully completed the Startup School Program conducted by the Parul Innovation & Entrepreneurship Research Centre (PIERC) during the 1st year of B.Tech, gaining foundational knowledge in entrepreneurship and startup development.

LANGUAGES

English (Fluent), Hindi (Conversational), Telugu (Native)
